POSITIONS HELD

U.S. Department of Agriculture - Agricultural Research Service

- 2024 – pres. **Laboratory Director (GS-15)** Lead USDA-ARS European Biological Control Laboratory (EBCL) near Montpellier, France and Thessaloniki, Greece. Manage laboratory budget and six scientists, plus technicians and staff. Conduct personal research on biological control, ensure administrative efficiency and financial stability of the laboratory while connecting with stakeholders in the U.S. and around the world.
- 2016 – 2024 **Supervisory Res. Biologist/ Research Leader (GS-14, -15)** Provided research and administrative leadership to the Tropical Crop and Commodity Protection Research Unit (Hilo, Hawaii), comprised of ten scientists plus staff. Manage unit budget and act as a research liaison to state, federal, university and other stakeholders. Conduct personal research on Tephritid fruit fly and other invasive pest biology and control.
- 2010 – 2016 **Research Biologist (GS-12, -13)** Designed and implemented a research program on Tephritid fruit fly biology and control in Hawaii. Planned and executed research, supervised up to six employees and published impactful research results.

National Institutes of Health - National Institute of Allergies and Infectious Diseases

- 2007 – 2010 **Post-doctoral Fellow** Researched *An. gambiae* ecology and evolution in the laboratory of Dr. José M.C. Ribeiro in Rockville, MD. Focused on mosquito sexual behavior and dry season ecology.

University of California, Los Angeles

- 2001 – 2006 **Graduate Student Researcher** Conducted research under the supervision of Dr. Charles E. Taylor in mosquito ecology, evolution and malaria epidemiology.
- 2003 – 2004 **Systems and Integrative Biology Fellow** Awarded NIH-funded fellowship to pursue courses in mathematical modeling and theory.

Long Beach Unified School District, Long Beach California

1998 – 2000 **Teacher** Provided instruction on all subject areas to Fifth graders who were English language learners at Garfield Elementary.

University of Southern California, Los Angeles California

1997 – 1998 **Laboratory Assistant** Prepared laboratories for introductory Life Science course.

Reed College, Portland Oregon

1995 – 1997 **Head Lab Assistant** Maintained an amphibian colony, aided with experiments and assisted with training in the laboratory of Dr. Robert H. Kaplan.

EDUCATION

PhD University of California, Los Angeles (Los Angeles, CA). Ecology and Evolutionary Biology, 2006.

BA Reed College (Portland, OR). Biology, 1997.

IB Diploma The British School, Rio de Janeiro (Brazil), 1992.

GRANTS, AWARDS, AND MEMBERSHIPS

2026 - 2031 Coordinator of international project on black scale, a pest of olives; Awarded \$73,000 by the California Olive Committee for year 1.

2025 USDA Secretary's Honor Award (team), "For exemplary service in responding to an unprecedented fruit fly emergency and successfully eradicating four invasive species in California"

2022-2024 Awarded \$124,500 by USDA-APHIS for project "Advancing Male Annihilation Technique for Invasive Culex-Responding Fruit Flies."

2022 - present Sigma Xi, The Scientific Research Honor Society, member.

2021 - 2022 Awarded \$25,000 ARS "Innovation Fund" (Round 14).

2019 - 2021 Awarded \$75,000 by California Dept of Food and Agriculture (CDFA) to support research on Male Annihilation Technique.

2017 Recipient of Department of Defense ESGR "Patriotic Employer" Award

2016 - 2018 Awarded \$140,000 ARS Administrator's Research Associate to support modeling (class of 2016).

2016 - 2018 Cooperator on \$170,000 Farm Bill section 10007 project to model Medfly risk in continental US.

2016 - 2017 Received \$110,000 to support postdoctoral researcher to implement Coffee Berry Borer Area-Wide Research.

2014 - 2015 Awarded \$80,000 USDA grant to create GIS-based spatial model of Coffee Berry Borer on Hawaii Island.

2013 - 2015	Co-PI on \$230,000 USDA-APHIS grant to support continuing work with Agent Based Simulation.
2013 - 2014	Awarded \$13,000 contract to model increased efficiency trapping networks and parametrize model with field work by IAEA/FAO.
2012 - present	Hawaiian Entomological Society, member.
2011 - present	Entomological Society of America, member.
2003 - 2004	Recipient of Systems and Integrative Biology Training Grant (NIH).
2001 - 2021	American Association for the Advancement of Science, member.
2000 - 2001	Recipient of California Genetic Resources Conservation Program Grant.
1995	Recipient of Reed College Independent Fieldwork Grant.

SELECTED INVITATIONS, APPOINTMENTS, AND PROFESSIONAL SERVICE

Invited member of Food and Agriculture Organization international technical advisory group on pest surveillance (2024 - present).

Invited to serve on special public panel “Biological control, myths and realities” by Hawaii Department of Agriculture as part of “invasive species awareness month” (2023).

Invited to be session moderator at 11th International Symposium on Fruit Flies of Economic Importance, Sydney Australia (2022).

Chief scientific investigator (agreement holder) on International Atomic Energy Agency Research Coordination Meeting (RCM) on improving Sterile Insect Technique (2021 - 2026).

Participant in International Atomic Energy Agency Research Coordination Meeting on MAT/SIT (2018 - 2023).

President of the Hawaiian Entomological Society (2021 - 2022).

Designated member of USDA team representing US in G-20 fruit fly technical group by National Program Leader (2019).

Invited to teach FAO/IAEA inter-regional training course on Sterile Insect Technique and Area-Wide control in Mexico, (2019).

Serving on Pacific Regional Inter Agency Biological Control working group (2019 - present).

Academic editor, *PLoS ONE* for sections Agriculture - Plants, Computer and information sciences - General, Ecology - Animals (2018 - present).

Editorial board member, *Journal of Insect Behavior* (2018 - present).

Nominated and selected to be a member of International Atomic Energy Agency/Food and Agriculture (IAEA/FAO) International Fruit Fly Steering Committee (2018 - present).

Member of Technical Advisory Group on tephritid trapping (New Zealand Fruit Fly Council; 2017 - 2018).

Affiliate Faculty, Tropical Conservation Biology and Environmental Studies Program at the University of Hawaii, Hilo (2016 - 2024).

Invited to National Taiwan University as featured speaker on trapping tephritids, Taipei (2016).

Editorial board member (Ecology and Evolution) *Scientific Reports* (2015 - 2017).

Member of the Entomological Society of America Diversity and Inclusion Committee (2015 - 2017).

Invited to consult on mass rearing methods at Google Life Sciences LLC, Mountain View CA (2015).

Participant in International Atomic Energy Agency Research Coordination Meeting (RCM) on Male mosquito biology and behavior in Petrolina, Brazil (2013).

Invited to participate in Degree-day modeling workshop at USDA-APHIS, Raleigh, NC (2011).

Member of local arrangement committee, Pacific Branch Meeting, Entomology Society of America, Waikoloa, Hawaii (2011).

Invited to present “Adaption and diversification in *Anopheles gambiae*, and their implications for malaria transmission”, special seminar at the Smithsonian National Zoo, Washington, DC (2009).

Presented “Population size and migratory patterns of *Anopheles gambiae* in the Bancoumana region of Mali and their significance for efficient vector control.” at the Fundação Luso-Americana (FLAD) Workshop on Malaria, Lisbon, Portugal (2009).

California State Science Fair Judge (1998 - 2002).

Reviewer for *Science*, *Theoretical Population Biology*, *J. of Economic Entomology*, *Acta Tropica*, *J. of Vector Ecology* *PLoS Neglected Tropical Diseases*, *Entomologia Experimentalis et Applicata*, *Insects*, *Physiological Entomology*, *Bioinformatics*, *PLoS ONE*, *Conservation Genetics Resources* and others, updated list see: <https://www.webofscience.com/wos/author/rid/V-9063-2019>

RESEARCH AND SKILLS

- Designed and led inter-agency Mark-Release-Recapture experiments in California and Florida with sterile fruit flies to improve Male Annihilation Technique (2018 - 2024).
- Conducting annual three-month sabbaticals at the ARS European Biocontrol Laboratory (EBCL) in Montpellier, France, to study parasitoids of *Bactrocera oleae* in quarantine and in field (2019 - 2023).

- Managed ecological surveys on the invasive Coffee Berry Borer (*Hypothenemus hampei*) on Hawaii Island (2016 - 2017).
- Led Mark-Release-Recapture experiments with fruit flies in Hawaii Island in tropical coastal areas and arid lava flats (2011 - 2016).
- Conducted field work on *Anopheles gambiae* mosquitoes in Bamako and Niono, Mali (2002 – 2010).
- Conducted non-destructive field sampling of *Pseudacris cadaverina* for genetic analysis in desert oases at Joshua Tree National Park (1999 - 2000).
- Completed a demographic survey of threespine sticklebacks (*Gasterosteus aculeatus*) in Reed Canyon (1995).
- Conducted survey of the nectivorous bat *Glossophaga soricina* in Rio de Janeiro, Brazil (1992).
- Fluent in Portuguese; Proficient in French and Spanish.

TEACHING EXPERIENCE

Summer 2020	Presented special invited seminar at Macquarie University (Australia) on insect detection.
Spring 2014	Organized and hosted “Coffee berry borer spatial modeling workshop” in Hilo and Kona with GIS experts from NASA, University of Hawaii researchers, extension agents and growers.
Spring 2013	Taught a graduate-level class titled “Computer Modeling and Simulation” in the Tropical Conservation, Biology and Environmental Science Department of the University of Hawaii, Hilo.
Fall 2012	Co-instructor of a one week bioinformatics workshop at University of Hawaii, Hilo.
Fall 2009	Taught a course titled “Introduction to Dynamic Biological System Modeling” in the Mathematics department of the Foundation for Advanced Education in the Sciences, National Institutes of Health, Bethesda Maryland.
2003	Co-taught a week-long workshop on computational biology and bioinformatics at the Malaria Research and Training Center, Bamako, Mali.
2000-2005	Teaching assistant for various courses, including Introductory Biology, Evolutionary Biology and Biological Computation in the Organismic Biology, Ecology and Evolution Department at University of California, Los Angeles.
1998–2000	Fifth grade teacher at Garfield Elementary, Long Beach Unified School District, Long Beach, California.
1995 – 1997	Student teacher and first coordinator of Reed College Biology Outreach Program, Portland Oregon.

COMPUTATION EXPERIENCE

- UNIX and GNU/Linux operating systems. Proficient programmer in Java, Python and R.
- Agent-based and matrix modeling.
- Computer Vision (CV).
- High Performance Computing (HPC) system design and administration. Was system administrator for HPC cluster moana.
- Data and metadata archiving and curation.
- GIS and spatial modeling.

SELECTED PRESENTATIONS

[1] H. Lee and N.C. Manoukis. Exploring variable selection approaches for robust species distribution modeling with MaxEnt. Pacific Branch Meeting of the Entomological Society of America, 2024.

[2] N.C. Manoukis. Spot density for Male Annihilation Technique (MAT) against *Bactrocera dorsalis*: Less is more. Florida FEED supervisor meeting, 2023.

[3] N.C. Manoukis, B.P. Caton, H. Fang, and G.R. Pallipparambil. New developments and applications of TrapGrid, a computer model for quantifying capture probability in a trap network. Pacific Branch Meeting of the Entomological Society of America, 2022.

[4] N. C. Manoukis. New technologies and approaches for controlling invasive *Bactrocera*: How we might build on our successes and address important gaps. Keynote presentation at 10th Tephritid Workers of the Western Hemisphere Conference, Bogota, Colombia, 2020.

[5] N. C. Manoukis. New App for CBB Monitoring and Control: Best Beans. Coffee Berry Borer Area-Wide Program “Virtual Talk Story” (University of Hawaii), 2020.

[6] N. C. Manoukis. Climate and Mediterranean Fruit Fly Invasion Persistence: Insights from Agent-Based Simulations. Oral Presentation at Third FAO-IAEA International Conference on Area-wide Management of Insect Pests: Integrating the Sterile Insect and Related Nuclear and Other Techniques, Vienna, Austria, 2017.

[7] N. C. Manoukis, B. Hall and S. M. Geib. A Computer Model of Attractant-Based Fruit Fly Traps and its Utility for Optimizing Trapping Networks. Poster Presentation at 9th International Symposium on Fruit Flies of Economic Importance, Bangkok, Thailand 2014.

[8] N. C. Manoukis. Effect of host *Bactrocera dorsalis* fruit fly sex on the parasitoid *Fopius arisanus*. Poster Presentation given at the Entomology 2013, Annual meeting of the Entomological Society of America, Austin TX.

- [9] N. C. Manoukis. An Agent-Based Simulation of Tephritid Fruit Flies: Time to Extirpation of *Ceratitidis capitata*. Oral Presentation given at the 8th Meeting of the Tephritid Workers of the Western Hemisphere, Panama City, Panama 2012.
- [10] N. C. Manoukis, S. Butail, D. A. Paley, A. S. Yaro, M. Diallo, S. F. Traoré, A. Dao, T. Lehmann and J. M. C. Ribeiro. Quantifying and analyzing the mosquito dance in mating swarms. Oral presentation given at the 2011 Entomological Society of America Pacific Branch Meeting, Waikaloa HI 2011.
- [11] Nicholas C. Manoukis, Abdoulaye Diabate, Abdoulaye Amadou, Moussa Diallo, Adama Dao, José M.C. Ribeiro, Fuyuki Tokumasu and Tovi Lehmann. Lights, camera, action: Male *Anopheles gambiae* mating behavior in the field. Poster presented at 56th Annual Meeting of the America Society of Tropical Medicine and Hygiene, Philadelphia PA, 2007
- [12] N. C. Manoukis, Y. Lee and C. E. Taylor. Detecting recurrent extinction in a metapopulation of *Anopheles gambiae*. Oral presentation given at the California Population and Evolutionary Genetics Group (CalPEG), San Diego CA, 2004.
- [13] N. C. Manoukis, M. A. Diuk-Wasser, M. B. Touré, G. Dolo, S. F. Traoré and C. E. Taylor. Malaria transmission and intraspecific competition in *Anopheles gambiae* at an irrigation project in Mali. Oral presentation given at 53th Annual Meeting of the America Society of Tropical Medicine and Hygiene, Miami FL, 2004.
- [14] N. C. Manoukis and C. E. Taylor. Effective Population Size of *Anopheles gambiae* s.s. in Mali: Some Implications for Malaria Control Through Genetically Modified Vectors. Oral presentation given at the Molecular and Population Biology of Mosquitoes Workshop (EMBO), Kolymbari, Greece, 2003.
- [15] Nicholas C. Manoukis and Robert H. Kaplan. The Complex and Dynamic Ecology of Drying Ponds: Interacting Effects of Density, Hydroperiod, and Habitat Size on the Metamorphic Traits of *Bombina orientalis* tadpoles. Oral presentation given at the Oregon Academy of Sciences, Portland OR, 1997
